L-R: Alfred Talke, Managing Director TALKE Group and Member of the Board of RSA-TALKE; Richard Heath, Director Middle East & USA TALKE Group and Chairman of the Board of RSA-TALKE; Sultan Ahmed bin Sulayem, DP World Group Chairman and CEO, Chairman of Ports, Customs and Free Zone Corporation; Abhishek Shah, Managing Director of RSA Logistics and Member of the Board of RSA-TALKE; Armin Talke, Managing Director TALKE Group; Ajay Shah, Chairman of RSA Logistics and Member of the Board of RSA-TALKE; Markus Gloeckler, Director Finance TALKE Group and Member of the Board of RSA-TALKE; Kirit Mehta, Director of RSA Logistics and Member of the Board of RSA-TALKE

Dubai, United Arab Emirates, 23. May 2016:

RSA-TALKE celebrated completion of the first phase of its integrated chemicals hub in Dubai's Jebel Ali Free Zone yesterday with an official ceremony. The facility is unique in the region in terms of the standards and the range of services offered and complements the existing state-of-the-art hazardous materials warehousing capacities in Dubai South.

The centrepiece of the inaugurated first phase of the chemicals hub is storage and transshipment capacity for up to 1,800 TEU – designed for empty or laden ISO tank containers with class 3, 6, 8 and 9 hazardous substances or non-hazardous chemicals. In addition to the purpose built warehouses in

Dubai South, which were constructed in accordance with international safety and environmental standards, RSA-TALKE also offers cleaning, maintenance, inspection and certification services for ISO tank containers.

"As the chemical and petrochemical companies here in the Gulf region increase their degree of vertical integration, their demand for comprehensive, professional specialist logistics services is increasing too", says Richard Heath, Director at RSA-TALKE. "In making this investment, we are supporting the diversification and growth of our customers by providing high-quality, reliable and safe services all from a single source and further cements Jebel Ali and Dubai's position as a chemicals hub", adds Abhishek Ajay Shah, who is also a Director at RSA-TALKE.

Sultan Ahmed Bin Sulayem, DP World Group Chairman and CEO, Chairman of the Ports, Customs and Free Zone Corporation said, "We are delighted to be a part of RSA-TALKE's remarkable growth in the region. The new facility will enable them to serve customers more efficiently and achieve even greater successes in the future. Jafza continually supports its valued business community of over 7,000 companies that have transformed it into a global centre for commerce and trade and an ideal business location for international and regional markets. I extend my best wishes to all the employees of RSA-TALKE and we remain fully supportive of the company's development."

The complex is part of a comprehensive, modern chemical logistics centre in Dubai, an important transit hub for the region. In its second and final phase of development, plants for drumming hazardous and non-hazardous liquid chemicals will be constructed at the site, as well as a warehouse for packed products. Hence, RSA-TALKE supplements and expands the

existing equally ultra-modern warehouses for hazardous and non-hazardous chemical and petrochemical products in Dubai South.

When combined with the global transport capacities that the joint venture and its partners have at their disposal, RSA-TALKE is able to offer a comprehensive portfolio of chemical logistics services that meet the highest quality and safety standards, all from a single source – and in doing so, closes a gap in the specialist logistics services on offer in the region.

To the editors

RSA-TALKE was established in 2013 to raise the bar in the GCC countries' chemical logistics. It is an international joint venture of equal partners with proven expertise in their niche.

The Dubai-based RSA Logistics and the German chemical logistics specialist ALFRED TALKE Logistic Services formed RSA-TALKE to provide state-of-the-art chemical logistics services for customers in the UAE and the GCC region, according to international standards of quality, safety, security, and efficiency. Combining their DNA of utmost reliability, high quality operations, and a dedication to personal service. Supporting chemical companies with professional solutions, around-the-clock availability and individual consultancy and advice.
